Research Interests

Human–AI Interaction and Evaluation; Accessibility and Inclusive Interaction; Mixed-Methods Empirical HCI; Immersive and Situated Interaction (AR/VR)

Education

Jiangnan University, Wuxi, China — Sept 2023 – Jun 2026
M.F.A. in Design Science – GPA: 89/100

Nanjing University of the Arts, Nanjing, China — Sept 2019 – Jun 2023
B.F.A. in Visual Communication Design – GPA: 3.84/5.0

Research Experience

Generative AI for Accessibility in Human–Computer Interaction — Jun 2025 – Present
Advisor: Prof. Feng Wang, Jiangnan University

- **Project Lead & First Author.** Conducting a PRISMA-based systematic review on generative AI for accessibility in HCI, screening 3,570 initial records and synthesizing 136 eligible studies, with an update search for recent 2025–2026 literature currently underway.
- Developed a multi-dimensional coding framework to analyze disability contexts, GenAI modalities, accessibility tasks, evaluation methods, disabled user involvement, and reported risks such as hallucination, privacy, overdependence, agency loss, and algorithmic ableism.
- Synthesizing findings into an HCI-focused taxonomy, evaluation-gap analysis, and design agenda for responsible GenAI accessibility research.
- **Outcome:** First-author manuscript in preparation, targeting submission in Fall 2026.

User Acceptance of Immersive Interactive Technologies: A Mixed-Methods Empirical Study — Jun 2024 – Jun 2025
Advisor: Prof. Feng Wang, Jiangnan University

- **Project Lead & Co-First Author.** Developed and validated an extended Technology Acceptance Model (TAM) with 16 hypotheses for interactive museum and cultural heritage contexts.
- Designed a 29-item Likert-scale survey and collected 566 valid responses; validated constructs and hypotheses using CB-SEM in AMOS.
- Triangulated quantitative findings through thematic analysis of 20 semi-structured interviews.
- **Outcome:** Co-first-author paper published in *Heritage* (2025), contributing design implications for immersive cultural heritage experiences.

Master's Thesis: Modeling User Acceptance of Emerging Interactive Technologies — Sept 2024 – May 2026
Advisor: Prof. Feng Wang, Jiangnan University
🏆 *Outstanding Master's Thesis Award*

- Integrated the SOR framework, TAM, and flow theory into a seven-construct model; surveyed 388 users and tested ten hypotheses via CB-SEM in AMOS.
- Designed and developed a mobile AR application using Unity and Vuforia SDK as the empirical testbed for evaluating user experience and acceptance in situated cultural heritage contexts.
- Identified perceived authenticity as a key driver of perceived usefulness and flow, and derived a five-dimension design strategy for public interactive displays.
- *Application context:* AR display of Yixing Zisha pottery heritage.

Honors and Awards

First-Class Scholarship, Jiangnan University (Top 5%)	2025
First-Class Scholarship, Jiangnan University (Top 5%)	2024
National Second Prize, *Milan Design Week China Collegiate Design Competition & Exhibition*	2024
National Third Prize, *Milan Design Week China Collegiate Design Competition & Exhibition*	2024
Outstanding Graduate, Nanjing University of the Arts (Top 3%)	2023
First-Class Scholarship, Nanjing University of the Arts (Top 4%)	2022
Bronze Award, *Singapore Fine Art Research Association Competition*	2022
National Silver Award, China International College Students' Innovation Competition	2021
First-Class Scholarship, Nanjing University of the Arts (Top 4%)	2021
First-Class Scholarship, Nanjing University of the Arts (Top 4%)	2020

Skills

User Research: Semi-structured Interviews, Survey Design, Thematic Analysis, PRISMA Systematic Review, Mixed Methods, Usability Testing

Quantitative Methods: CB-SEM, Reliability and Validity Testing, Descriptive and Inferential Statistics, SPSS, AMOS

Prototyping & Development: Unity3D, Vuforia AR, Figma, TouchDesigner, Arduino, Blender, Cinema 4D, Adobe Suite (Photoshop, Illustrator, After Effects, Premiere)

Programming & Analysis: Python for data processing and analysis, MATLAB

Languages & Tests: Mandarin Chinese (Native), English (TOEFL 106), GRE 333 + 4.0
