Jiaxuan Gong

gongjiaxuan169@gmail.com | gongjiaxuan.github.io | Scholar | (+86) 18912122391

Research Interests

Human–AI Interaction, Agent-Based Systems, Accessible & Assistive Technology, Immersive Media (AR/VR), User Experience

Education

Jiangnan University, Wuxi, China — Sept 2023 – Jun 2026 (expected)
M.F.A. in Design Science – GPA: 89/100

- Core Courses: Public Art and Digital Innovation (94)

Nanjing University of the Arts, Nanjing, China — Sept 2019 – Jun 2023
B.F.A. in Visual Communication Design – GPA: 3.84/5.0

- Core Courses: Technological innovation and design (90), Digital media interaction design (90)

Papers

Research Experiences

Master's Thesis: AR Display Design for Cultural Heritage & User Acceptance — Sep 2024 – May 2026
Advisor: Prof. Feng Wang, Jiangnan University

- **AR Prototype:** Designed and developed a mobile AR application for Yixing Zisha pottery heritage using Unity and Vuforia SDK, covering pot form knowledge, clay comparison, and craftsmanship display modules.
- **Empirical Study:** Integrated SOR framework, TAM, and flow theory into a seven-construct model; surveyed 388 users and tested ten hypotheses via CB-SEM (AMOS), with nine supported.
- **Design Implications:** Identified perceived authenticity as the strongest acceptance driver ($\beta = 0.541$ on PU, $\beta = 0.452$ on Flow) and derived design strategies for AR display in public cultural spaces.

Enhancing Public Access to Cultural Heritage via Immersive VR Experiences — Jun 2024 – Jun 2025
Advisor: Prof. Feng Wang, Jiangnan University

- **Project Lead & Co-First Author:** Developed an HCI-grounded Technology Acceptance Model (TAM) tailored to interactive museum contexts, proposing 16 testable hypotheses.
- Validated constructs via a 29-item Likert survey ($N = 566$) using CB-SEM (AMOS) and triangulated findings

through thematic analysis of 20 semi-structured interviews.

- **Outcome:** Co-first-author paper published in *Heritage*; contributed actionable guidelines for digital museum experience design.

Generative AI for Accessibility in HCI Jun 2025 – Present

Advisor: Prof. Feng Wang, Jiangnan University

- **Project Lead & First Author:** Conducted a PRISMA-based systematic literature review (2020–2025), screening 3,570 records to map the nascent GenAI accessibility landscape.
- Constructed a multi-dimensional coding scheme to qualitatively analyze 136 eligible studies, exposing systemic gaps (e.g., neglected motor impairments) and ethical risks including algorithmic ableism.
- **Outcome:** First-author manuscript in preparation; proposed a "Born Accessible" paradigm for GenAI development and disability-centered governance.

Human-AI Collaboration in Sustainable Online Consumption Jan 2025 – Jun 2025

Advisor: Prof. Ken Nah, Hongik University

- Conducted reliability and validity testing for an extended TAM framework using SPSS and AMOS.
- Operationalized a hybrid SEM–ANN approach to capture non-linear behavioral drivers of LLM-assisted consumption.
- **Outcome:** Co-authored paper published in *Applied Sciences*; advanced understanding of AI transparency in e-commerce behavior.

Honors and Awards

First-Class Scholarship from Jiangnan University (Top 5%)	2025
First-Class Scholarship from Jiangnan University (Top 5%)	2024
National Second Prize, *Milan Design Week China Collegiate Design Competition & Exhibition*	2024
National Third Prize, *Milan Design Week China Collegiate Design Competition & Exhibition*	2024
Outstanding Graduate of Nanjing University of the Arts (Top 3%)	2023
First-Class Scholarship from Nanjing University of the Arts (Top 4%)	2022
Bronze Award, *Singapore Fine Art Research Association Competition*	2022
National Silver Award, China International College Students' Innovation Competition	2021
First-Class Scholarship from Nanjing University of the Arts (Top 4%)	2021
First-Class Scholarship from Nanjing University of the Arts (Top 4%)	2020

Skills

Research: Interviews, Survey Design, Thematic Analysis, PRISMA Systematic Review, Mixed Methods

Technical: Python, LaTeX, MATLAB, SPSS, AMOS, Microsoft Office

Design & Prototyping: Figma, Blender, C4D, Unity3D, Unreal Engine, TouchDesigner, Arduino, Adobe Suite (Photoshop, Illustrator, After Effects, Premiere)

Languages: Mandarin (Native), English (TOEFL 106, GRE 333+4.0)
