

HCI+2026 | Human-Centered Intelligence+暑期研究项目导师介绍

HCIX Research Club 2026年5月1日 16:56 广东

项目介绍

Human-Centered Intelligence+ (HCI+) 是由清华大学、香港城市大学、香港科技大学（广州）等多所国内外知名高校和机构的人机交互领域知名教授联合组织操办。此项目结合了往年广受欢迎的暑研项目“**HCI·X**”与“**Access Computing Summer Program (ACSP)**”的优质资源和经验,旨在为全球热爱人机交互与智能系统的优秀学子搭建一个接触和学习人机交互研究的多元、开放、协作的平台。

项目聚焦以人为本的智能技术创新，鼓励多学科背景的学生通过团队协作和实践项目，探索如何利用人工智能和人机交互推动社会福祉、健康、无障碍、可持续发展等重要议题。参与者将在顶尖导师团队的带领下，深入体验学术前沿，收获宝贵的研究与创新实践经历。

每位参与者将以小组形式，加入由一名导师带领的具体应用研究项目，在团队合作中深入体验真实的科研与创新过程。项目期间还将特别邀请来自学术界与业界的人机交互、人工智能等领域的知名专家开设系列专题讲座和前沿课程，系统拓展同学们的人机交互视野，提升跨领域研究能力。

2026年，HCI+ 暑期项目将招募若干远程工作的实习生参与到各位导师的多个人机交互课题研究中。申请者将参与到项目中至少三个月，每周至少30个小时。项目持续录取，各项目导师将会于5月开始面试，申请结果将由导师团队综合决定。

我们相信，真正有温度的智能，源于**对“人”的理解**。欢迎热爱创新、富有同理心与社会责任感你，加入HCI+，与全球志同道合的伙伴一起共创未来！

- 项目时间：2026年6-9月（具体由各项目导师自定）
- 地点：远程
- 申请及面试日期：滚动制录取，关注后续推送
- 报名方式：通过报名系统报名

人员介绍

学术顾问委员

Yuanchun Shi
Professor, Tsinghua University

Shengdong Zhao
Professor, City University of Hong Kong

项目主席

Xin Yi
Associate Professor, Tsinghua University

导师团队

HCI+暑期项目汇聚了来自国内外知名高校和科研机构的人机交互、人工智能等领域的优秀学者与研究员，担任项目导师。

(按姓名首字母A~Z排序，排名不分先后)

Pengcheng An
Assistant Professor,
Southern University of Science and Technology

Bio: Dr. Pengcheng An is currently a Doctoral Supervisor at the Southern University of Science and Technology (SUSTech), exploring novel application opportunities for artificial intelligence and robotics in real-world scenarios. He received his Ph.D. from Eindhoven University of Technology (TU/e) and subsequently conducted postdoctoral research at both TU/e and the University of Waterloo. His research has been recognized with several prestigious peer-reviewed honors, including the ACM CHI Best Paper Award and the IJHCS Best Research Paper of the Year Award. His current research focuses on Human-AI Interaction (HAI) systems tailored for educational and mental health scenarios.

Xinyi Fu

Associate Professor,
Tsinghua University

Bio: Dr. Xinyi Fu's primary research focuses on multimodal sensing, computing, and interaction within living environments, with a particular emphasis on sensing and modeling human behavior and psychology through multi-channel sensing. Her team's work encompasses a wide range of areas, from perceiving human behaviors and emotional/psychological states to supporting applications in smart homes, embodied artificial intelligence (AI), virtual reality (VR), and digital cultural tourism. She serves as a committee member for the CCF (China Computer Federation) Technical Committees on Ubiquitous Computing and Human-Computer Interaction, as well as the CSIG (China Society of Image and Graphics) Technical Committee on Affective Computing and Understanding. Additionally, she is a member of the Organizing Committee for CHI 2024 and CHI 2027.

Nan Gao

Associate Professor,
Nankai University

Bio: Dr. Nan Gao is an Associate Professor and Doctoral Supervisor at the College of Software, Nankai University, and Director of the Nankai-Tianyi AI Joint Laboratory. She received her Ph.D. from RMIT in Australia under Prof Flora Salim, then served as the Shuimu Postdoctoral Scholar in Prof Yuanchun Shi's team at Tsinghua University and was a visiting fellow at UNSW. She has published in top-tier venues such as IMWUT, CHI, and CSCW. She holds the IMWUT Distinguished Paper Award (first author) and serves as IMWUT Associate Editor and CHI Associate Chair. Her work has been covered by ABC News and 100+ outlets. Her research asks: as AI grows able to read human behavior and emotion, how should we design and govern it so people live better? Working across HCI, psychology, and education, she focuses on the practical application of LLMs in mental health, emotional companionship, and home/school learning to reach real students and families. Homepage: <https://nancygao.com/>

Jiangtao Gong

Associate Professor,
Shanghai Jiao Tong University

Bio: Dr. Jiangtao Gong is a Tenure-Track Associate Professor at Shanghai Jiao Tong University, primarily focusing on the design of human-like intelligent interactive systems and human-AI collaboration. Prior to this role, she served as a Senior Researcher at Lenovo Research and as the Leader of the Human-AI Interaction Group at the Institute for AI Industry Research (AIR), Tsinghua University. She has a long-standing research background in intelligent interactive systems, human-AI collaboration, and human-like agents. Honors and recognitions include the ACM SIGCHI China Rising Star Award and the BAAI (Beijing Academy of Artificial Intelligence) Young Scholar Award. She serves as the Principal Investigator (PI) for projects funded by the National Natural Science Foundation of China (NSFC), a sub-project of the National Key R&D Program of China, and the Beijing Science and Technology Plan. Additionally, her research is supported by several leading tech enterprises. She has published her work in top-tier conferences in HCI, such as CHI, CSCW, UIST, and IMUWT, as well as in top-tier AI/robotics conferences like AAAI, NuerIPS, ICRA, IROS, WWW, and ICLR.

Feilin Han

Assistant Professor,
Tongji University

Bio: Dr. Feilin Han is an Assistant Professor at the College of Design and Innovation, Tongji University, and a faculty member of the Intelligent Big Data Visualization Lab (iDVx), collaborating with Prof. Nan Cao. With an interdisciplinary background in AI and Art, she received Ph.D. in Digital Art and Design from the College of Computer Science and Technology, Zhejiang University. Prior to joining Tongji, she worked as a lecturer at the Beijing Film Academy. Dr. Han's research interests include Generative AI, Perceptual Computing, Human-Computer Interaction, and Intelligent Media Design. She has published papers in CHI, ACM MM, and AAAI, and was selected into the Young Elite Scientists Sponsorship Program by the Beijing Association for Science and Technology in 2024. She served as the Principal Investigator (PI) for projects funded by the National Social Science Foundation of China and the Natural Science Foundation of Beijing.

Yang Jiao

Assistant Professor,
Tsinghua University

Bio: Dr. Yang Jiao is an Assistant Professor at the Future Laboratory of Tsinghua University, where he leads research groups in accessible design innovation, immersive experience design, and natural user experience design. He serves as the academic advisor for the Creative Design and Intelligent Engineering (CDIE) program at Xinya College, Tsinghua University, and the Executive Committee Member of the Human-Computer Interaction Professional Committee of CCF. Dr. Jiao received his Ph.D. from the Department of Information Art & Design at the Academy of Arts & Design, Tsinghua University, and conducted collaborative research at Purdue University in the United States during his postdoc. His primary research focuses include information art design, human-computer interaction design, and accessible design. With over 30 academic publications and one monograph to his credit, Dr. Jiao has led more than 10 national, provincial, and enterprise collaborative research projects. His work bridges technological innovation with human-centered design principles, contributing to interdisciplinary research in design and engineering.

Guanhong Liu

Associate Professor,
Tongji University

Bio: Dr. Guanhong Liu is an Associate Professor at the College of Design and Innovation, Tongji University. Her research interests include Human-Computer Interaction, Digital Cultural Heritage, and Technology-Enhanced Learning. She explores how interactive and intelligent technologies can support cultural innovation, creative expression, and learning experiences. She has led projects funded by the National Natural Science Foundation of China and the Humanities and Social Sciences Fund of the Ministry of Education, and has published over 20 papers in leading international HCI venues including ACM CHI, UIST, CSCW, and IMWUT. Her design works have been exhibited at Dutch Design Week and Milan Design Week, and featured by mainstream media. She is a recipient of the ICACHI Rising Star Award and serves as an Associate Chair for CHI and CSCW, as well as a committee member of CCF-HCI, CCF-CAD/CG, and ICACHI.

RAY LC

Assistant Professor of Creative Media,
City University of Hong Kong

Bio: RAY LC (PhD UCLA, MFA Parsons School of Design) is Assistant Professor of Creative Media at City University of Hong Kong. RAY LC's practice probes how we see ourselves from perspectives of the future, given how we currently understand and (mis)interpret our own past. RAY is fascinated by how humans express their creativity under differing constraints of technologies of the past and present, from grounded movements of dance performance to speculative design with GenAI. RAY tells these stories of adaptation via video installation, large-scale robotics, immersive media, and participatory design, taking insight from his own research in neuroscience (Nature Communications) and HCI (CHI, CSCW, HRI, DIS). These outcomes are exhibited at venues like the New York Hall of Science, Kyoto Design Lab, Ars Electronica Linz, Saari Residency, NeurIPS, CVPR, Angewandte Festival, Osage Gallery, Macao International Art Biennale, Videotage, Goethe Institute, Hong Kong Arts Centre, PMQ, Tai Kwun Contemporary, Science Gallery MSU, National Asia Culture Center Gwangju, G.MAP, ISEA, IEEE VISAP.

Jiannan Li

Assistant Professor,
Singapore Management University

Bio: Dr. Li Jiannan is an Assistant Professor of Computer Science at the School of Computing and Information Systems, Singapore Management University. His primary research interests include Human-Robot Interaction, Human-AI Interaction, and Intelligent Educational Interfaces. He has received Best Paper and Best Paper Honorable Mention awards at top conferences including CHI, HRI, and VIS. Additionally, his research is supported by Google.

Yue Li

Associate Professor,
Xi'an Jiaotong-Liverpool University

Bio: Dr. Yue Li is an Associate Professor in the Department of Computing at Xi'an Jiaotong-Liverpool University (XJTLU) and the director of the Heritage, Edutainment, and Reality Laboratory (HER Lab). Dr. Li's research primarily focuses on interdisciplinary fields, including Human-Computer Interaction (HCI), Virtual Reality (VR), Augmented Reality (AR), cultural heritage, and educational technology. In recent years, Dr. Li has published over 90 papers in top-tier international journals and conferences, such as ACM TOCHI, IEEE TVCG, IHCI, IEEE VR, ACM CHI, ACM CSCW, and IEEE ISMAR. Additionally, Dr. Li has filed four invention patents as the primary inventor. These academic contributions have been recognized with multiple Best Paper Awards, Best Poster Awards, and Best Oral Presentation Awards. She serves as the Principal Investigator (PI) for numerous research projects, including the Youth Programme of the National Natural Science Foundation of China (NSFC), the Industry-University Collaborative Education Programme of the Ministry of Education, and the General Programme of Natural Science Research for Higher Education Institutions of Jiangsu Province. Furthermore, Dr. Li has been selected for the Jiangsu Province "Shuangchuang" (Mass Entrepreneurship and Innovation) Doctoral Programme and recognized as a Key Talent in Science and Education in Suzhou. More details can be found in <https://imyueli.github.io/> and <https://hiherlab.github.io/>.

Dong Ma

Associate professor,
University of Cambridge

Bio: Dr. Dong Ma is an Associate Professor at the Department of Computing Science and Technology, University of Cambridge. He is also a Fellow at Queens' College, Cambridge. He earned his PhD at the University of New South Wales, Australia in 2019. His primary research focuses on wearable computing, leveraging wearable devices to sense human behavior and physiological signals. More recently, he has developed an interest in embedded machine learning and physiological foundation models. His goal is to build transformative, intelligent, and efficient wearable-based human sensing systems. He has received several best paper awards in prestigious venues and actively serve in the organizing and technical committee of top conferences in the field. More details can be found at <https://www.dongma.info/>.

Xin Tong

Assistant Professor,
The Hong Kong University of Science and Technology (Guangzhou)

Bio: Dr. Xin Tong, Assistant Professor in the Computational Media and Arts (CMA) Thrust, Information Hub at the Hong Kong University of Science and Technology (Guangzhou) and an Adjunct Assistant Professor at Duke Kunshan University (DKU). She was awarded a Postdoctoral Scholar Award by the Natural Sciences and Engineering Research Council of Canada (NSERC) and worked as a postdoctoral fellow at the Pervasive Wellbeing Technology Lab at School of Medicine, Stanford University. She obtained her Ph.D. and master's degrees from Simon Fraser University in Canada. Her doctoral dissertation won the Bill Buxton 2021 Best Doctoral Dissertation Award (top 1), awarded by the Canadian Human-Computer Interaction Association. Her research focuses on the application of human-computer interaction (HCI) and human-AI collaboration in the fields of healthcare, wellbeing, accessibility, and digital cultural heritage, including technologies such as VR/AR, AI/ML, Generative AI and LLM. Dr. Xin Tong has received multiple awards and grants from the NSERC, the ACM CHI 2024 Best Paper Award (top 1%), MITACS in Canada, Microsoft, and government agencies in Suzhou and Kunshan. She was also awarded the 2023-2024 Outstanding Individual Award by the Kunshan Association for Science and Technology.

Qi Wang

Associate Professor,
Tongji University

Bio: Dr. Qi Wang is an Associate Professor at the College of Design and Innovation, Tongji University. She received her Ph.D. from the Department of Industrial Design at Eindhoven University of Technology. Guided by principles of sustainability and societal impact, her research follows two complementary paths: innovative wearable technologies, and domain-driven health and rehabilitation design. On one hand, she advances cutting-edge wearable systems integrating LLMs, AI, and smart textiles. On the other hand, in the health domain, she collaborates extensively with hospitals to develop clinically relevant rehabilitation solutions. She has published her work in prestigious venues such as CHI, IMWUT, and UIST, with a cumulative citation count of 1300 and an H-index of 12 in Google Scholar. She is the recipient of grants from the National Natural Science Foundation of China and the Shanghai Yangfan Youth Talented Fund by the Shanghai Science and Technology Committee, among others. Research Areas: Wearable Technology: AI-enabled Wearable Systems, Smart Textiles, Sustainable Interactive Systems, Health & Rehabilitation: Assistive Technologies, Rehabilitation Design, Healthcare XR Applications, Patient-centered Design. Website: <https://tongjicdi.com>

Yun Wang

Associate Professor, School of New Media Art and Design, Beihang University

Bio: Yun Wang is an associate professor at the School of New Media Art and Design, and a member of the State Key Laboratory of Virtual Reality Technology and Systems, Beihang University. Her research focuses on Responsible Design Methodologies and User Experience (UX) in complex systems, with a focus on natural Human-Computer Interaction (nHCI) and physical Human-Robot Interaction (pHRI). She has led multiple national research projects, including the NSFC Youth Program and the National Research Program for Technological Innovation in Culture and Tourism of China. She has published over 30 research papers in top-tier design or HCI venues such as CHI, CSCW, and UIST. In addition, her collaborative interdisciplinary work has appeared in renowned journals including Science Robotics, Nature Communications and Advanced Science.

Yuntao Wang

Associate Professor (Research Track),
Tsinghua University

Bio: Dr. Yuntao Wang is an associate professor (research track) in the Department of Computer Science and Technology at Tsinghua University, where he works in the Pervasive Interaction Lab on Human-Computer Interaction (HCI) and Ubiquitous Computing. Dr. Wang's research focuses on efficient behavioral and physiological computing on edge devices. He has published more than 80 conference or journal papers including CHI, IMWUT, UIST, etc. Nine of his papers were recognized as best papers or honorable mentioned awards. Dr. Wang's research work was recognized by the Young Elite Scientists Sponsorship Program by the China Association for Science and Technology (CAST) in 2022, Wu Wenjun Outstanding Youth Award for Artificial Intelligence in 2024, the First Prize of Science and Technology Award of the Chinese Institute of Electronics (CIE) in 2019, the Excellent Innovation Award of the Chinese Association of Artificial Intelligence (CAAI) in 2021.

Shirley Xue

Assistant Professor,
Purdue University

Bio: Dr. Qiyue Xue is an assistant professor in the Department of Computer Science at Purdue University, leading the Snowball Lab. She received her Ph.D. in Computer Science and Engineering from the University of Washington, advised by Shwetak Patel and Vikram Iyer. During her PhD, she interned at Microsoft Research, Apple AI/ML, and Google Health. She earned her B.S. in Computer Science and B.S. in Electrical Engineering from Peking University, and her M.S. in Computer Science from the Georgia Institute of Technology. She is broadly interested in Ubiquitous Computing, Human-Computer Interaction, Wearables, Computing for Health, and novel Sensing Techniques. Her recent work focuses on advancing the wearable

space by transforming everyday accessories into low-power, intelligent systems that enable applications previously difficult or impossible to achieve. These applications span health, well-being, and human-computer interaction.

Yukang Yan

Assistant Professor,
University of Rochester

Bio: Dr. Yukang Yan is an Assistant Professor leading Behavioral Enhancement and Adaptive Reality (BEAR) Lab, in the Department of Computer Science, University of Rochester. Before that, he was a postdoctoral researcher in the Augmented Perception Lab, Human-Computer Interaction Institute at Carnegie Mellon University. He earned both his Ph.D. and Bachelor's degree from Tsinghua University. His research focus lies in Human-Computer Interaction and Mixed Reality. He published journals and papers at ACM CHI, ACM UIST, ACM IMWUT, IEEE VR, with ACM CHI 2020, 2023, 2025 Honorable Mention Award, IEEE VR Best Paper Nominee Award. Yukang served as CHI 23 Late-Breaking Work Co-Chair and UIST 24 Registration Chair.

Xin Yi

Associate Professor,
Tsinghua University

Bio: Dr. Xin Yi is an Associate Professor in the Institute for Network Sciences and Cyberspace at Tsinghua University. His research interests include usable privacy and security, human-computer interaction, mixed reality, and human-AI interaction. He has published more than 40 papers on top-tier conferences and journals including CHI, UIST and Ubicomp, and has won the honorable mention awards of CHI 2017 and CHI 2019, Ubicomp 2025 Best Student Challenge Award, CCS 2025 HAIPS Workshop Distinguished Paper Award, and IJCAI Deepfake Detection Competition Best Paper Candidate Award. He also received the First Prize of Science and Technology Award of the Chinese Institute of Electronics (CIE) in 2019, and the Excellent Innovation Award of the Chinese Association of Artificial Intelligence (CAAI) in 2021.

Chun Yu

Associate Professor,
Tsinghua University

Bio: Dr. Chun Yu is an Associate Professor at the Computer Science and Technology, Tsinghua University. His research centers on enhancing human-computer interaction (HCI) to facilitate more intuitive and efficient interaction between people and computers. He is committed to creating significant HCI advancements through the integration of software, hardware, and AI, deeply informed by the human experience. This work has led to more than 80 publications in premier HCI forums, including ACM CHI, UIST and Ubicomp, and has garnered 14 awards for Best Paper or Honorable Mention. The practical applications of his research have been adopted by industry leaders and incorporated into widely-used commercial products, reaching over 600 million users.

Hao Zhang

Associate Professor,
Institute of Software Chinese Academy of Sciences

Bio: Dr. Hao Zhang is an Associate Researcher at the Institute of Software, Chinese Academy of Sciences (ISCAS), and received his Ph.D. from the University of Chinese Academy of Sciences. His research focuses on natural human-computer interaction and smart healthcare. He has developed several models and systems, including a model for human movement uncertainty, a suite of technologies and tools for understanding interaction intent, and an intelligent HCI technology toolbox for the early warning of neurological diseases. He serves as the Secretary-General of the ACM SIGCHI China Chapter. He has published over 20 papers in premier HCI conferences and journals, including ACM CHI and IJHCS, and is a recipient of the Best Paper Honorable Mention Award at ACM CHI 2020.

项目收获

- 系统学习并实践人机交互领域的定量、定性研究方法与创新设计流程，学习学术论文写作、文献检索等科研技能；
- 参加由国内外知名导师主办的研讨会、讲座、工作坊及学术答疑，与业界、学界专家学者进一步交流；
- 表现优异的同学有机会获得导师的推荐信，并有机会与导师进一步探讨后续实习及博士申请，甚至获得预录取机会；

- 在老师指导下完成学术论文协作，将研究成果以论文形式投稿至国际顶级会议/期刊（如 CHI、IMWUT、UIST、UbiComp等），作者署名均按实际贡献排序；
- 结识来自全球有志于人机交互领域的优秀伙伴，建立学术社交与合作网络。

项目形式

HCI+ 2026暑期项目将以**远程线上**形式开展。

申请条件

1. 申请者须具有较高的英语听说、阅读及写作水平，如有相关成绩证明（雅思、托福、GRE 等语言测试）请在简历文件中提供；
2. 目前为国内外高校计算机科学、电子工程、工业工程及相关专业的本科或硕士在读学生或毕业生，或具备同等专业能力者；
3. 有人机交互、人因工程、人工智能等方向的研究经历的申请者优先考虑，但非必需；
4. 本项目采用**滚动录取**，招满即止，请有意向的同学尽早提交申请。

申请方式

本届HCI+ 暑期项目将围绕人机交互领域的多个前沿课题展开研究，采用双向选择的方式，匹配每位指导教师、研究方向以及实习生。申请人可根据兴趣选择意向课题和导师，项目组将综合评估后进行匹配分组。

具体的申请方式及研究方向详情请关注后续官方推送，敬请期待！
