

Jiaxuan Gong

gongjiaxuan169@gmail.com | [gongjiaxuan.github.io](https://github.com/gongjiaxuan) | [Google Scholar](#)

Research Interests

Human-AI Interaction; Accessibility and Inclusive Design; Accessible Information; Mixed-Methods HCI

Education

Jiangnan University, Wuxi, China Sept 2023 - Jun 2026
M.F.A. in Design Science - GPA: 89/100

Nanjing University of the Arts, Nanjing, China Sept 2019 - Jun 2023
B.F.A. in Visual Communication Design - GPA: 3.84/5.0

Research Experience

Generative AI for Accessibility in HCI: A Systematic Review of Evaluation, Participation, and Design Responsibilities Jun 2025 - Present
Advisor: Prof. Feng Wang, Jiangnan University, China

- **Project Lead & First Author.** Leading a systematic review of generative AI for accessibility in HCI; screened 7,184 unique records and assessed 703 full texts.
- Developed and applied a coding framework covering disability context, GenAI modality, accessibility task, evaluation method, study setting, and participation of disabled users.
- Synthesizing evidence on evaluation practices, user participation, and responsibility for verifying or correcting AI outputs.
- Preparing a first-author manuscript for submission to the *International Journal of Human-Computer Interaction*.

VR Acceptance in Cultural Heritage: A Mixed-Methods Empirical Study Jun 2024 - Jun 2025
Advisor: Prof. Feng Wang, Jiangnan University, China

- **Project Lead & Co-First Author.** Developed and validated an extended Technology Acceptance Model (TAM) with 16 hypotheses for interactive museum and cultural heritage contexts.
- Designed a 29-item Likert-scale survey and collected 566 valid responses; validated constructs and hypotheses using CB-SEM in AMOS.
- Triangulated quantitative findings through thematic analysis of 20 semi-structured interviews.
- Published in *Heritage* (2025) with equal first authorship.

Master's Thesis: User Experience and Design of AR Displays for Traditional Crafts Sept 2024 - May 2026
Advisor: Prof. Feng Wang, Jiangnan University, China
Outstanding Master's Thesis Award

- Developed a mobile AR application in Unity with the Vuforia SDK to present the cultural heritage of Yixing Zisha pottery.
- Integrated the SOR framework, TAM, and flow theory into a seven-construct model; collected 388 survey responses and tested ten hypotheses using CB-SEM in AMOS.
- Identified perceived authenticity as a driver of perceived usefulness and flow, and translated the findings into five design recommendations for public AR displays.

Honors and Awards

First-Class Scholarship, Jiangnan University (Top 5%)	2025
First-Class Scholarship, Jiangnan University (Top 5%)	2024
National Second Prize, <i>Milan Design Week China Collegiate Design Competition & Exhibition</i>	2024
National Third Prize, <i>Milan Design Week China Collegiate Design Competition & Exhibition</i>	2024
Outstanding Graduate, Nanjing University of the Arts (Top 3%)	2023
First-Class Scholarship, Nanjing University of the Arts (Top 4%)	2022
Bronze Award, <i>Singapore Fine Art Research Association Competition</i>	2022
National Silver Award, China International College Students' Innovation Competition	2021
First-Class Scholarship, Nanjing University of the Arts (Top 4%)	2021
First-Class Scholarship, Nanjing University of the Arts (Top 4%)	2020

Skills

Research Methods: Semi-structured Interviews, Survey Design, Thematic Analysis, Systematic Review and Evidence Synthesis, Mixed Methods, Usability Testing

Quantitative Methods: CB-SEM, Reliability and Validity Testing, Descriptive and Inferential Statistics, SPSS, AMOS

Design & Prototyping: Figma, Unity3D, Vuforia AR, TouchDesigner, Arduino, Blender, Cinema 4D, Adobe Creative Cloud (Photoshop, Illustrator, After Effects, Premiere)

Programming & Analysis: Python (data processing and analysis), MATLAB

Languages & Tests: Mandarin Chinese (Native), English (TOEFL 106), GRE 333 + 4.0
