

Jiaxuan Gong

gongjiaxuan169@gmail.com [gongjiaxuan.github.io](https://github.com/gongjiaxuan) [Google Scholar](#)

Research Interests

Human–AI Interaction; Creativity Support Tools for Professional Design; User Agency and Reflective Practice; Mixed-Methods Empirical HCI

Education

Jiangnan University, Wuxi, China Sept 2023 – Jun 2026
M.F.A. in Design Science – GPA: 89/100

Nanjing University of the Arts, Nanjing, China Sept 2019 – Jun 2023
B.F.A. in Visual Communication Design – GPA: 3.84/5.0

Research Experience

Generative AI for Accessibility in HCI: A Systematic Review of Evaluation, Participation, and Design Responsibilities Jun 2025 – Present
Advisor: Prof. Feng Wang, Jiangnan University

- **Project Lead & First Author.** Conducting a systematic review of generative AI for accessibility in HCI; screened 7,184 unique records, assessed 703 full texts, and retained 248 studies for analysis.
- Coded the studies by disability context, GenAI modality, accessibility task, evaluation method, study setting, and participation of disabled users.
- Examining how accessibility outcomes are evaluated, how disabled users participate, and who is expected to verify or correct AI outputs.
- Preparing a first-author manuscript for submission to the *International Journal of Human–Computer Interaction*.

User Acceptance of Immersive Interactive Technologies: A Mixed-Methods Empirical Study Jun 2024 – Jun 2025
Advisor: Prof. Feng Wang, Jiangnan University

- **Project Lead & Co-First Author.** Developed and validated an extended Technology Acceptance Model (TAM) with 16 hypotheses for interactive museum and cultural heritage contexts.
- Designed a 29-item Likert-scale survey and collected 566 valid responses; validated constructs and hypotheses using CB-SEM in AMOS.
- Triangulated quantitative findings through thematic analysis of 20 semi-structured interviews.
- Published in *Heritage* (2025) with equal first authorship.

Master's Thesis: User Experience and Design of AR Displays for Traditional Crafts Sept 2024 – May 2026
Advisor: Prof. Feng Wang, Jiangnan University
Outstanding Master's Thesis Award

- Integrated the SOR framework, TAM, and flow theory into a seven-construct model; surveyed 388 users and tested ten hypotheses via CB-SEM in AMOS.
- Built a mobile AR application in Unity with Vuforia SDK and used it as the interactive prototype in the user study.
- Identified perceived authenticity as a key driver of perceived usefulness and flow, and translated the model results into five design recommendations for public AR displays.
- The prototype focused on the cultural heritage of Yixing Zisha pottery.

Honors and Awards

First-Class Scholarship, Jiangnan University (Top 5%)	2025
First-Class Scholarship, Jiangnan University (Top 5%)	2024
National Second Prize, <i>Milan Design Week China Collegiate Design Competition & Exhibition</i>	2024
National Third Prize, <i>Milan Design Week China Collegiate Design Competition & Exhibition</i>	2024
Outstanding Graduate, Nanjing University of the Arts (Top 3%)	2023
First-Class Scholarship, Nanjing University of the Arts (Top 4%)	2022
Bronze Award, <i>Singapore Fine Art Research Association Competition</i>	2022
National Silver Award, China International College Students' Innovation Competition	2021
First-Class Scholarship, Nanjing University of the Arts (Top 4%)	2021
First-Class Scholarship, Nanjing University of the Arts (Top 4%)	2020

Skills

User Research: Semi-structured Interviews, Survey Design, Thematic Analysis, Systematic Literature Review and Evidence Synthesis, Mixed Methods, Usability Testing

Quantitative Methods: CB-SEM, Reliability and Validity Testing, Descriptive and Inferential Statistics, SPSS, AMOS

Prototyping & Development: Unity3D, Vuforia AR, Figma, TouchDesigner, Arduino, Blender, Cinema 4D, Adobe Suite (Photoshop, Illustrator, After Effects, Premiere)

Programming & Analysis: Python for data processing and analysis, MATLAB

Languages & Tests: Mandarin Chinese (Native), English (TOEFL 106), GRE 333 + 4.0
